

Getting to Know Me Assignment Due September 26th

Create a 3 to 5-slide PowerPoint or Google Presentation telling the class about you.

(Note – If you do not have the PowerPoint program ask your parents if you can go to <https://drive.google.com> and create a presentation – it is free but they will need to create a google account)

For your presentation you might choose to include:

- Your name, grade, age, etc.
- How long you have been at Mountain Home and/or Glacier High
- Photos of you, things you like to do, or other important things to you.
- Why you are taking Robotics and Engineering and what you are hoping to get out of this class.
- What you might want to do after High School
- A picture of your favorite ROV
- Any other interesting information about you like:
 - Sports you're involved in
 - Special awards/accomplishments
 - Information about your family
 - Hobbies, interests
 - An embarrassing moment
- Please submit your assignment to Mr. Hagen at <http://www.glacierhighcharter.org/rov-classwork.html> or email him at ehagen@glacierhighcharter.org or bring a USB drive.

I will choose students at random to present to the class September 26th and continuing throughout the next several classes.
